

# Recommendations for school check

These recommendations are for reference only and can be adjusted for a specific situation.

1. First of all make sure to add [school rule set](#) to all students.
2. Redirect to <http://search.skydns.ru> of those search engines which does not have automatic safe-search or use existing «School rule set (search-engines)»
3. Configure [https-filtration](#) or restrict port 443 on the firewall.
